User Registration

Description

As a student,  
I want to create an account  
So that I can save my flashcards.  
Acceptance Criteria  
Given I am a new user  
When I provide a valid email, username, and password  
Then my account is created successfully.  
Given I already have an account  
When I try to register with the same email  
Then the system displays an error message.  
Given my account is created  
When I log in  
Then I can access my personal flashcards.

Create Topic

+ ...

▼ Description

As a student

I want to create a study topic

So that I can organize my flashcards.

Acceptance Criteria

- User can create a topic.
- Topic name is required.
- Topic appears immediately after creation.

DoR

- User authenticated.
- Topic model defined.

DoD

- CRUD endpoint created.
- Front-end integrated.
- Tests passing.

Edit Topic

Description

As a student

I want to edit a topic

So that I can keep my study materials organized.

Acceptance Criteria

Seria interessante escrevê-los no padrão **Given / When / Then**:

Given

an existing topic

When

I change the topic name and save it

Then

the new topic name is displayed.

Given

an existing topic

When

I enter an empty topic name

Then

the system displays a validation error.

Definition of Ready (DoR)

O DoR que você escreveu está muito simples. Uma versão melhor seria:

Definition of Ready (DoR)

O DoR que você escreveu está muito simples. Uma versão melhor seria:

- Topic exists.
- User is authenticated.
- Acceptance Criteria are defined.
- UI design is available.

Definition of Done (DoD)

Também pode ser mais completo:

- Feature implemented.
- Acceptance Criteria satisfied.
- Unit tests passed.
- Code reviewed.
- Integrated with backend.
- Ready for deployment.
